

## Rising Bollard Buyer's Guide

Purchasing the right security system to match your specific needs can be a challenge and there are many things for you to consider.

We have therefore taken the opportunity of listing below some of the key questions you need to ask before making a decision to purchase.

- What are the basic reasons for you installing a system?
- What level of security do you want?
- What is the anticipated level of usage?
- How many vehicles require access on a daily basis?
- Who is to be given authorised access?
- Is the system to operate on a 24-hour basis or just evenings or overnight?
- Be aware of safety issues!
- Do you want to speak to or view visitors before you give them access?
- What happens in the event of a power failure?
- Do you want to override the system if the rising bollard is damaged?
- Do you need to consider any building work that may be needed such as piers, ducts & driveway alterations before installation can commence as this may inflate the cost?
- Is an electricity supply available or does it need to be installed?

Access Control Automation can respond positively to all of the above as we offer a comprehensive range of solutions [see [rising bollards](#)] that can help us to provide the right system to match your exact requirements.
